# Worldflow Monitoring Service

## Published continuously since 2002!

Flow Research began the Worldflow Monitoring Service in 2002 as a way to keep you updated between flow studies. The Worldflow Monitoring Service consists of the following quarterly publications:

- Market Barometer
- Energy Monitor

The Market Barometer keeps you up-to-date on new products and changes within the flowmeter industry. The Energy Monitor is focused on the energy industries:

- Oil & Gas & Refining
- Power & Renewables

In addition we do periodic Worldflow User Perspective surveys that keep you posted on changes in customer preferences and decision-making patterns. Periodic White Papers provide in-depth coverage on important topics in flow and energy.

Please use the EZ Email Order Form on the other side of this page if you would like to order the **Worldflow Monitoring Service**, or would like a free trial subscription. And thank you for your interest!

WE CREATE CHANGE IN FLOW
